Mr. Daniel Stiehl Venture Corporation 1701 West McDonald Street Hartford City, IN 47348

Re: 009-16036

Second Administrative Amendment to

Part 70 No.: T 009-6492-00008

Dear Mr. Stiehl:

Venture Corporation was issued Part 70 operating permit T009-6492-00008 on December 28, 2000, for the operation of a stationary plastic automotive parts and components manufacturing plant. An application to add a new dust collector was received on September 3, 2002. According to 326 IAC 2-7-11(a)(8), an administrative amendment can be used for a modification that "revises descriptive information where the revision will not trigger a new applicable requirement or violate a permit term". The addition of the dust collector meets this requirement, therefore, pursuant to the provisions of 2-7-11 the permit is hereby administratively amended as follows (strike-out to show deletion and **bold** to show additions):

(1) Section A.3 is amended as follows:

A.3 Specifically Regulated Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities which are specifically regulated, as defined in 326 IAC 2-7-1(21):
(a) ...... (c)

(d) A cartridge dust collector, identified as VS-2, with an air flow rate of 17,000 actual cubic feet per minute, exhausting at stack identified as VS-2.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Madhurima Moulik, OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call at (800) 451-6027, press 0 and ask for Madhurima Moulik or extension 3-0868, or dial (317) 233-0868.

Sincerely,

Paul Dubenetzky, Chief Permits Branch Office of Air Quality

- (i) Two (2) thermal fluid heaters, identified as HO1 and HO2, constructed in 1985, exhausting to stacks S1 and S2, capacity: 3.1 million British thermal units per hour, each.
- (j) One (1) gasket seal oven, identified as OV1, constructed in 1994, exhausting to stack S3, capacity: 0.4 million British thermal units per hour.
- (k) Air make up heaters, identified as AH1, constructed in 1985, capacity: 23.25 million British thermal units per hour, total.
- (l) Two (2) SRIM molding presses, identified as P9 and P10, constructed in 2001, each with a maximum unit capacity of 30 parts per hour.

## A.3 Insignificant Activities [326 IAC 2-7-1(21)] [326 IAC 2-7-4(c)] [326 IAC 2-7-5(15)]

This stationary source also includes the following insignificant activities, as defined in 326 IAC 2-7-1(21):

- (a) Grinding and machining operations controlled with fabric filters, scrubbers, mist collectors, wet collectors and electrostatic precipitators with a design grain loading of less than or equal to 0.03 grains per actual cubic foot and a gas flow rate less than or equal to 4,000 actual cubic feet per minute, including the following: deburring; buffing; polishing; abrasive blasting; pneumatic conveying; and woodworking operations.
- (b) Activities with emissions equal to or less than the significant activity thresholds: fume and mist emissions associated with heat transfer fluid miscellaneous drips from piping or transfer equipment; fugitive dust associated with road traffic or staging area traffic on the stone surface locations; particulate matter (PM<sub>10</sub>) from the blower exhaust at the vacuum system serving the press building plastic part drilling stations.
- (c) Degreasing operations that do not exceed 145 gallons per 12 months, except if subject to 326 IAC 20-6.
- (d) A cartridge dust collector, identified as VS-2, with an air flow rate of 17,000 actual cubic feet per minute, exhausting at stack identified as VS-2.

### A.4 Part 70 Permit Applicability [326 IAC 2-7-2]

This stationary source is required to have a Part 70 permit by 326 IAC 2-7-2 (Applicability) because:

- (a) It is a major source, as defined in 326 IAC 2-7-1(22);
- (b) It is a source in a source category designated by the United States Environmental Protection Agency (U.S. EPA) under 40 CFR 70.3 (Part 70 Applicability).
